

Camping

Camping parks are a great place to bike. Never leave your bicycles behind because you are towing a camper, boat or have limited space. Take all the equipment you enjoy, including a group of **Bag Bikes** for your entire family.

Boating

Travelling via waterways doesn't mean you have to lose your ground transportation. The **Bag Bike** can fit in vessels of various sizes, including a canoe! Discover what lays on the land of that distant shore with **The Bag Bike**.

RV Travel

Fit several bikes in your motorhome. The **Bag Bike** fits nicely in the storage areas of most motorhomes. Keep your bicycle secure and out of the elements when you travel.

Bike Carrier Free

Don't ruin your vehicle with a carrier. Why deal with a bike carrier that can scratch your vehicle's finish and makes the vehicle look clumsy. The **Bag Bike** fits in the trunk of even the smallest supercompact and sports cars.

Cross Country

Airline travel with a **Bag Bike** is a snap! Wherever your destination, the **Bag Bike** can be checked in as luggage and fits easily into taxis, rental cars and in and out of hotel rooms.

Recreational Pilots

Explore the area of your next destination with the **Bag Bike**. It fits inside the smallest personal aircraft with ease.

The Innovative Bag Bike

The mountain bike that requires only 8 cubic feet for storage and can be assembled in 2 minutes, without any tools.

Easily Transported in:

Ultra-Compact Cars

Compact Cars

Compact Trucks

Boats & Canoes

Sports Cars

Whether travelling to a local park, or flying across the country, the **Bag Bike** can be transported easily in two bags.

Two bags offer the ability to better distribute the bike when carrying. It also makes loading into a tight space much easier.

The rear frame assembly, seat, and quick-release handlebars are situated in one bag.

The front fork assembly, cross-member, and quick-release pedals fit in the other bag.

The Bag Bike's storage bags fit neatly into a third bag designed to fit on the front handlebar.

Multiple Patents Pending

Motor Homes and RV can carry multiple **Bag Bikes** securely and out of the elements during travel in the storage areas.

No need to worry about your **Bag Bike** when stowed away for travel.

The **Bag Bike** can even fit inside the cabin of one of the smallest personal airplanes, the Cessna 150. It's perfect for aeronautical fly-ins and for basic ground transportation at nearly any destination you can fly to.

The innovative design, of the **Bag Bike** allows it to be stowed in the smallest of vehicles.

The **Bag Bike** fits in the diminutive trunk of a 2007 Corvette convertible with a some room to spare. It fits neatly in the rear storage area of the Mini Cooper.

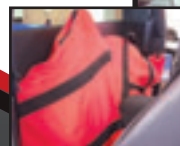

The **Bag Bike** requires only 8 cubic feet of storage area when disassembled, its patented three-piece design, makes the **Bag Bike** easy to lift and handle.

The **Bag Bike** fits neatly behind the seats of a standard cab compact pickup truck like the Chevrolet Colorado.

The **Bag Bike** is a full size 26-inch, 18 speed mountain bike. It can be assembled or disassembled in less than 2 minutes without the use of any tools, and fits neatly into two separate bags.

With its fast assembly and disassembly, compact design and rugged storage bags, the **Bag Bike** easily adapts for boating use. Whether simply canoeing across a lake or river or a week long excursion in a cabin cruiser, the **Bag Bike** is an effective and reliable bicycle for your land excursion when you reach your next port.
